Dear Partners,

The Bakalland Group with the turnover of approx. 140 mln EUR, 4 processing plants, about 1000 employees and 300 branded 200 private labels products is one of the largest food companies operating in Poland.

Bakalland is the undisputed leader with many years of experience in dried fruit & nuts. For more than 25 years specializing in this category, and its experience and expertise translates well into other segments as breakfast products and muesli bars.

Our brands have won many awards and honors, and the quality of our products is confirmed by a number of certificates such as: BRC Global Standard for Food Safety, Management System Standard ISO 9001:2008, FSSC 22000.

The Bakalland Group is characterized by consistent growth, the continues expansion of the portfolio, entering new markets and strengthening the market position of the brands. The company regularly increases sales of its products outside Europe and now has a presence in several other continents – Asia, Africa, North America, Australia.

Our mission is continuous innovation and excellence providing the highest quality of our products and the highest level of the relations with our partners, distributors and customers. We enjoy prestigious partnership with key players and distributors worldwide as we build a profitable, competitive and sustainable business through our people.

Our commitment is recognized by consumers, investors and business partners in Poland and worldwide.

Kind regards,

Marek Moczulski
President of the Management Board
The Bakalland Group
Production plant in Janów Podlaski

The production plant in Janów Podlaski is one of the most modern factories in Europe in the production sector for dried fruit and nuts occupies more than 9000 square metres. It operates 15 production lines, manufacturing close to 200 million packed units of dried fruits and nuts and bars per year. The roasting furnaces produce average 8000 tonnes of muesli and roasted nuts. The quality assurance system implemented in accordance with BRC Global Standards is maintained to the highest level A and constant checks on products and production process, staff training and supplier audits form an integral part of the system. All production lines are equipped with product and weight control detection system to automatically separate any non-compliant products.

Production plant in Włocławek

Delecta company is a part of the Bakalland Capital Group since 2014. The plant dates back to 1816 year established by the family of Bohm. There are three production lines operating in Włocławek with total production area 13,700 square metres. One of the production line produce desserts (instant desserts, puddings, jellies), instant cakes and additives (i.e. cake fillings, toppings) and mixed spices for cakes and gelling mixtures for jams. Second line produce ready meals (Zagłoba and Si Mexico). The third line is dedicated to cereal coffee. The current production volume is estimated at 155 million units of packed desserts 18 million packs of coffee, and 3 millions ready meals.
Production plant in Łódź

The production plant in Łódź is a modern factory focused on breakfast products. The plant covers an area of 3400 square meters, manufacturing average 4000 tonnes of cereals per year. Mostly traditional and processed cereals as pillows, balls, flakes and shells. The factory uses modern production machinery and the production capacity is more than 400 tonnes per month. The plant in Łódź is BRC certificated that confirms the quality and safety standards and the company engagement in product quality investment.

Production plant in Osina

In the production plant in Osina the cake fillings and soy products are produced. The production site covers about 6000 square meters with the great potential to expand. Production is divided into wet and dry production halls, with 4 operating production lines. The production capacity for cake fillings is about 17 million units per year, textured soy products line, the first of this type in Poland, with the production capacity 3 million kg per year, soy pates is about 18 million units per year, soy meals is about 4 million units per year.
